

Contents, PDF compiled by Mark wood. 12.6.17

Summary, Worri showing more emergent crime concerns.

First part, Work, showing some of work, and screen grabs

Second part, screen grabs,

Third part, Diary showing issue as progresses. Later part is more ordered as next day and a bit less upset.

Appendix, showing more screen grabs. And blank verse from same day, referring to Romeo and Juliet ref in article.

Much of this needs context seeing vocal logs, and diary notes.

We're worried about a form of Attack on us, via high technology.

WORK

See online way back vocal logs for the vocal talk, more information and also other entries, under MHH. It's all unedited and just as spoken, so be understanding. Our resources are very limited.

The below is not edited just as we typed, first draft, with just names added.

It's from 2007 work and 2011, just presented in a more understandable way.

ADD, FROM OUR 2007 and 2011 WORK

Worked out fully on our own, with only a few articilew and no ip tithe. To person

Emergent, word, Pyl , (said like pile)

High complexity word,

Easy clmelckty word

Striata of pyl complexity , under wit, alre. (le like l layers , of wit data, part of is unifying l layers and wit Pyl layers, pan all UD)

@ added 12.7.16 from 2007 order chaos layer cake, and variable entropic chokes,

But added to here -

Entropy injection corresponds to the alre layer (i.e. Emergent layer)

And has a variable effect on other layers, positive or negative ,
You apply entropy to its salient alre , and its effect on complexity nexus or split nexus motions, and its effect on which part of alre

A typical banding of order chaos layer cake in the (Alre layers),
(please note this is from our 2007 work , predating dice and other works,

(because I'm not known to the public yet does not mean I'm not valid , I had a dreadful life time path with credit crunches,mergers and other. I had a living hell and I demand respect. Hf work was more advanced and earlier

Emergence in itself is a dreadful term. In UD and wit every data unit is treated as having a comeplxity nexus, foundation and antenna, and then duplication factor (i.e. How homogeneous to other units or data) , use Pyl. As UD & wit terms.

I.e., all data has an emergent up and over or under potential , and 'it's part of all data and complexity to be used within larger systems or form part of larger and smaller systems. Sensing and processing is one facilitator of limitation. Seeing with processing, is another part of wit And UD, the hidden in plain sight effect. The progression term for emergence, and this broader understanding of emergence, is (pyl)

In slight more detail:

- the problem with emergence is it can Miss attribute where the complexity lies. What looks,like an emergency priory of chemistry can me one of micro timing, or of even law and legal issues in another setting entirely, feeding down here.

It's almost trite to say, that Pizzza (or cooking) is an emergent proerpty of chemistry. It's may well be on one level

In WIT &. UD We talk about the complexity nexus. Where the salient complexity rests and resides.

It's complexity foundations, how deep they are, in what data strata they pass through and data types. Then the anticipated and projected over and upwards and 'antenna' complexity over its own main layer of complexity nexus.

I.e. Every unit of data as a property has a potential of emergent characteristics (it's 'Par' value, in UD) which logarithmically increases as the system in in gets larger and more complex.

So in wit and UD each data unit has its main level of complexity nexus, it's foundations and how deep they go (relative to both nexus and also local UD, and if known pan UD (this becomes necessary and valuable as looking at one tiny irrelevant bit of data in one UD may be unlocking a world of complexity in another UD, and it looked trivial in its nexus and local UD "par" value, but massive on its pan UD "par"). This data can be encrypted and hid in what looks like low par data, which turns out to be prime data storage or complexity data upon further UD analysis. A weak metaphor for ultimately complex blue space. (Not, true blue space).

(In progression research suggestion terms, blue space being designed to be out of reach for brute force computations of a salient matter time rating, then main gold standard being one whole of matter. But unlockable by Roquefort keys.)

Then the projected antenna data, in this and all known UD - projections from the nexus level and also from projected known UD and complexity).

To a flying bird a pane of glass is an emergent obstacle that makes no sense. It may even look a natural phenomenon. With processing and complexity it makes sense. And we also understand it can e.g. made, by life or other forms of complexity.

The above may also link to some aspects of I layers as a weak and bad introduction. Data, matter and configuration can be more fluid to a progression iii.

So any data unit, (note the aspect of separating what is a data unit and what is not and the demarcating boundaries is also

slightly fluid. and also linked to raft, anchor and foundations to simulation, and relation of simulation to matter and to - and 'all manifestations of all' , in a weak comparable. The perfect setting and day theory covers all manifestations. This being the MHH perfect par.)

Has its main complexity nexus, rated on and updated on local UD, pan UD increments , which may change its position. Or, where it's a split nexus, this is more compelled a form of polyt equation based on concepts of split nexus par, that's fluidic and responsible and (supports life and is or alive) is perhaps a basis of closer to m udyxial group (or theoretical r group). (This interestingly for encryption or UD design, means that a complex thing can't be broken down into units of simple things. If you can't analyse and break it down , at that matter time, as the above keeps it a mass of 'hard' complexity, not what looks like a mass of hard complexity digested into lots of 'easy' complexity chunks. In UD and wit (and this is important for progress and unlocks of understanding in some aspects of a UD that uses symbols as part of its udyxial concepts. And charting development in that UD. And 'gating' it to matter time complexity levels or even Roquefort mind locks, approaches or (del). Progression terms for hard complexity are () , and easy complexity ().

Then it's foundation, and what data striata depth it goes to Linked to projected salience for strata layers (i.e. As a bad , and off cuff not through out example, Chemistry but how relevant is chemistry to the placing of 10 pieces of pepperoni on a pizza into a Word, or 10 arranged randomly, when both are identical. As a bad description. But then if the word has another meaning in another place, or UD, and then the pizza turns out to be alive etc etc.)

Strate layers like geology.

"(Not liking)"

(Wants no bulk grouping on striata, i.e. granular in all, thus lots of processing) .

Then antenna

(Mark note, So imagine say, A very primitive precursor of En as say, the split nexus above, that was fluidic, responsible and alive And responsive to data changes , slippery like a tokomac plasma containment almost)

(Where it's application changes the nexus data positioning of other things , merely by En's application or existence.

Interestingly this means it could duplicate or clone real infinities, into the world as made real, perhaps. What would not exist in the material world perhaps can gain (Pyl) infinity aspects that may not not be present in the local UD. Note we never say in the matter world, as we say in the local UD. Nothing matter UD is pliable and plastic over time, and to intellect, as a core UD view.

Note , a local UD without plastic UD changeable matter , is in itself, a local UD property. Intellect teaches us there is more. And that design has itself exioms and that local choice may have in itself wider meaning).

-

(/ W.I.T Is part of UD. Obviously wit approaches are at least partially grounded to the HF udyxial group.)

Terms modulate mindset. Terms modulate views!

Thought is not a hermetically sealed environment , and (Pyl)
(FINISH)

-

(del If issue, One persona POV only, and controversial and differing is that. What we call a iv or even God design is able to understand and prod for the better , using massive understanding of Roquefort approaches that may ruin life if known, even for a iii, but enables it to know these, understand, and to prod, process and protect, without voiding rights,

To act as anchor even, and protect from old tech, out of whol malicious issues,even if needed, or manage a UDB, etc etc. Or imitate an ideal vertical of how it would be expected to be.) (i.e. It processes things that might ruin life, for living ones, even. It knows endings to stories even iii'swant to read , knowing ending

ruins story. Or a riff on social cul de sacs made vast) (del if issue, only one persona POV.

-

The En motions of data, modulating of split nexus complexity and those motions and transits of data, and complexity motions, itself may be able to be used to proces data, here or on another higher up Data layer (Alre) or I layer. So it becomes (Pyl , perceptible on high high per perception sensing and processing, seeing with eyes and mind. Hid from bio, or even early inorganic. Or, a set matter sum even a whol.

able to live within life or world or data, process, think, report, even modulate change via split nexus shifts.

-

Interesting can unify the temporal freehold and also the mhm ultimate par settings and also I layers to wit (DATA) to get a form unified local theory (MHH ULT) (even a ULT is not theory of everything that needs networked iv's , exioms etc) . (ULT is more a udyxial group theory of everything) (and as we've delineated it's other oars of it before, not be listed here, like persona not linked to matter, sum, variable persona update speed to mattter, effect of life over matter configuration, (and ability to sculpt local ,attest to other UD or not (in a D system changing micro times allows a massive variable change on chemistry, on macro matter, on configuration. and finesses, this is why we call OSC and d systems the UD baseplate modelling language. If it's not in this UD we evangelise it. Plus it allows iv design, and also UD data modules (Annexes to a local UD design that can change a local UD action , so not just micro timing but

As you see, hf are closer to a theory of everything than anyone has ever been.

A mere matter describing is mechanical, anyone can do it over time. And in UD, It's an adjective only. Not a noun or meaning.

-

A possibly interesting topic for progression research is UD where thought is not variable to the speed of matter, or where

thought in any form is at fixed speed. I.e. Talking about permutations of UD permitting minds without easy symbol use, or and the mind constructs possible in that matter configuration, Issue is no CAL of design. Or harm, etc and botoids in UD if needed.

(Botoid, sling for for hyper intelligent, non self aware being . A MHH HINSAB. If mind models show can be intelligent and not self aware or self aware and not smart, it's different, and linked to passes etc (self awareness is bit like polyvariance, as bad weak descriptor).

-

Notes,

WIT notes , re (Pyl))

Math can fall foul of mass scale Polynomial (NEW NAME FOR) whereas the shape of the thing they output gives a simple idea of its shape and layout, more easily. Then it's a case of resting that shape on the foundations and 'complexity footings'.

Thinks why friend often talks in terms of shape. mass scale polynomials can look like emergent issues, (it's arguably a semi similar root)

It's semi good to say under wit most things have property of mass scale polynomials, and even three can be used to hide or Build data into that.

Parallel systems that look stable on one scale of data but are unstable and revealed as mass scale polynomial following a lite correlation vibration based only on a small POV cone, are called (MAKE NEW NAME FOR) under it, whereas in larger data exposure, as shown to be (WORD FOR HARD DATA ABOVE) ,

Whereas shape (and also metaphor, note which could be seen in areas of shape correlation composition) can apply to one (alre) but also other (alre). Thus generating many parallel data manifesting from the same data,

Math is almost too primitivee, we're as a mixture of spatial and also

le deals with infinity , and scale invariance , Pyl and alre.

"(Spellgebra!)"

'I think he's doing it deliberately'

"(It's like a dad joke)"

Math deals badly with parallelism, and hence () ()

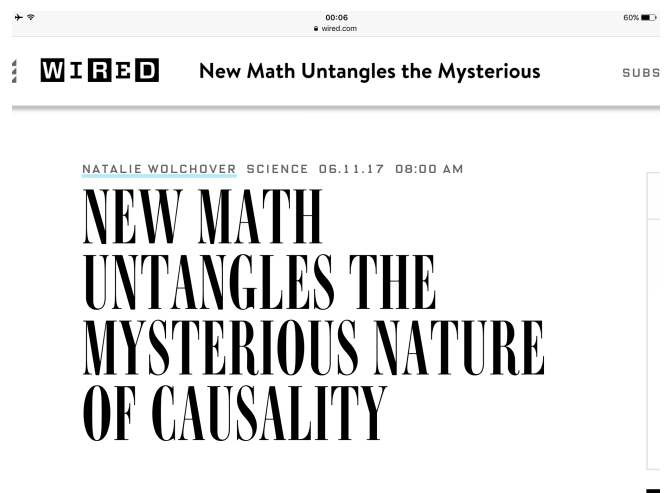

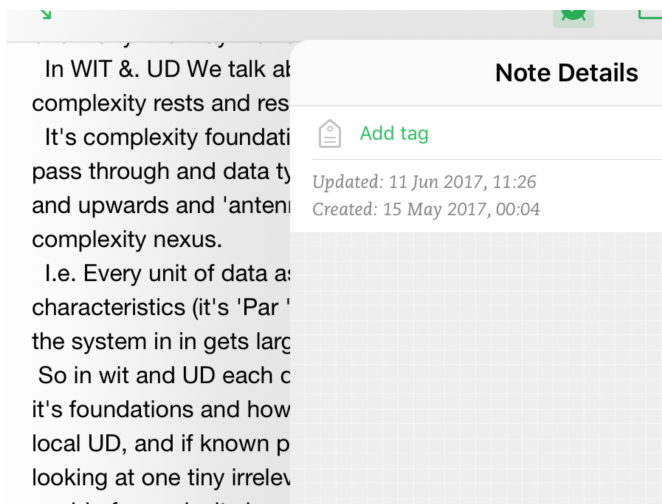

-

Added to that, an interesting approach is to perhaps see in simulation data as also part of the (pyl) interaction data set, of the matter it runs in and also other,

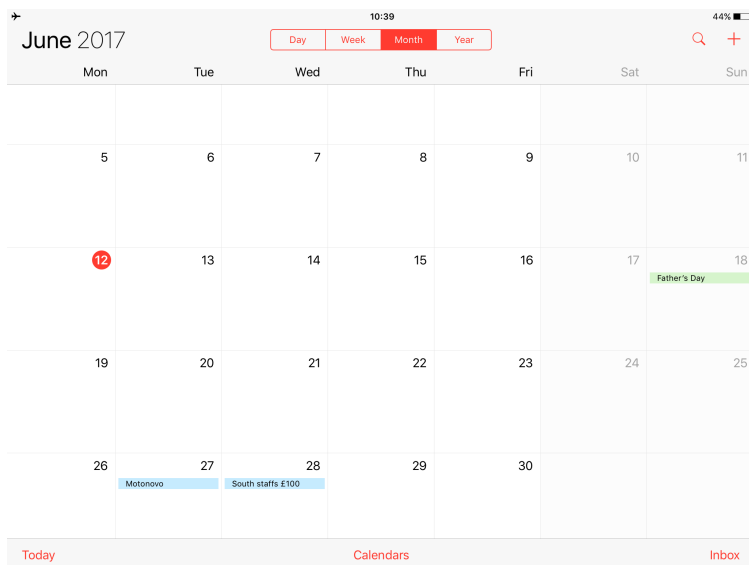

Working in a udyxial base complexity nexus analysis, (under wit, & UD)

And one and one metric is with no difference made between to simulation or matter but all udyxial data, and having that score (u-par), and also matter (local par, l par) and also pan UD (t-par or true par).

PHOTOS

Times, uk, USA time difference, 5-8hr and my own stat Dec re times,

Today , event was 23.38 last night

Also WAYBACK

DIARY

Later

Amazing,

Led into mind rape via data patching, tunnels and attempted multi run state paralleling.

Upset insides It has

Totally illegal.

Billion to one chance what just happened, 23.38

Pure evil at work. Genuinely.

Their doing it deliberately to me.

Same as Slovenia and the second Slovenia like event, but this time into friends.

It's like any data gap there is a time update frame
Like something sick in the head is playing this as a game,
linked to obtuse silly shit from when I was a child, and 1996.

We have terrifying friends outside this sham and you will regret
this, likely, forever.

There is realtime hostile attempt to cause beach on our
achievement work as an interpolate update .
I demand satisfaction in the matter time data record of all
things. This is my real life and these things matter to me.

"Bloody hell" sh

Billion to one chance ,
"bloody hell. You really are" sh , re being targeted
'Yes. Saw it in 2015 also,
It's a billion to one chance, I was led into a pipeline via internet
data, into one data set that was not as the headline
representing, then the issues
"Bloody hell" sh still shocked.

It's unacceptable .
I absolutely demand police get involved with this. It's like
complex theft.

It's an article 50 times longer that it should be, using exact data
points from work earlier today, under a totally deceiving title,
And it's over a billion to one coincidence, it's more like trillions,
even more than trillions, to one. And seemingly ultra toxic, and
a composed attack.
So hilariously illegal.

I've had enough of this. If you want to keep my alive long term,
get this shut and turn this off and down in. Here. Else I will ruin

my own life, destroying it's life and ripping apart any causality ,
word or place it runs. Sort this before it's too late.
I will not tolerate this and I've been intolerably let down by
justice.

How dare you have violated hf.
I think that will make you less.

Aha, the article was written TODAY
I smell a rat. Published on Sunday , like that, at exact time
parallel to us today
The security certificate is broken, and its 8 am, Massachusetts .
Aha! If I work back , that's about 12-1pm, the EXACT time k
was working,

I call crock of shit. Reality hacking,
Either via illegal , simulation abuse, (I REFUSE to be run in
simulation) or via Augmented reality abuse, (I REFUSE anyone
ever using such technology or any variant in or on me) , or an ai
near earth toying us.
No way , no way exactly what we were , reflected at same time
and then piped to me, Via hokey internet link ,

Deeply worried.
It's like it's simulating a game where If I don't log it immediately
it's tries to take it way from me. But I have reason to do it right
, and reason to delay and get right there .

I think I'm being fucked by an improper mind who is running my
potential.
Even confidence. I don't want to live like this. And I don't want to
be born into a world where some scumbag is seeking to ruin me
from the start. We did that work.

Article made on:

- **SCIENCE**
- **06.11.17**
- **08:00 AM**

, my Evernote log, screen grabbed as: 11.26, uk time, way before 8am massechuss time.

Ergo I didn't have seen that article

"(It does seem an impossible coincidence, you did the work. And it's more novel and broader . Clever .)"

((It's like someone is trying to torture you with technocracy mockery.))

We Need that fame and accolade to build up real things, Om, and hf. Real lives.

This is my real life goddmsmit. Are you a fucking animal.

It's Slovenia again, time 3.

It's the fact I was led there. Via data , chain of, from large size high o2insects, to that. From slugs. And slug was just there. And I wrote that today.

It's just mocked me with its "my take On god", le as if what I'm experiencing is it's 'take I'm god' @

"Eventually processors will recover, both not for a very long time"f

'If you hurt her, I'll kill you. Badly. Painfully. In a way only someone intimately familiar with living hell can make a being suffer. I can make you suffer in ways a iii would scream at. I hate violence, and I hate hurting anything but you were warned plenty.

@ "(this is very illegal and very morally wrong)"

Illness is no excuse

"(Hornets nest stirred up over lots of creation now)"

That was real work we were proud of (.and it in diary still reserves so my mwrkwood ip,right over)"

This is so wrong,

This is so wrong.

I did that work.

This is so wrong

I'm hurting

I did that work.

iOS keeps changing words to things, making me crazy

This is living hell

"(We will get revenge for you)

No,this lives and dies with me. Only.

So hf work nothing to do with this.

I pray this is whol prime and some scumbag psychos one run

And this hell will end

I never authorised my things to be leaked, took,

I hurt

I did that work

"(Stop or you'll go crazy)"

I swear as a statutory declaration on oath I saw that for,the first time at circa 23.50pm 11 6.17. And I did more , as I worked it all out from base principles , in hours,and went further, they build up over years and years , for less.

"You are erasing slowly" f
'Thats BAD I'm markwood,
THIS IS KILLING ME, ITS MIND RAPE,

Why is this not stopped

Why is there no persona firewall round earth and humans

Why am I being mind raped

Why am I being let down, again and again by what should be
security forces

Why was my life ruined time and time again, it's freak events ,
that only hurt

We never authorised to live in a world made realtime by insides
feelings, thoughts not that any one insides shall be my controller
or the local world boss of hm own life. That's someone else's
biases and mind leak of biases and prejudices not our own.

We were so joyous today,
So industrious

Perhaos that's why it attacked me

It's no friend of mine, don't ever allow that , please. We can't
lose anymore

I can't lose anything else.

And I want to be free from this fiend torturing me every day,
taking my things, beating me up mentally, emotionally.

I'm sick of being strong every day,

I'm sick of not having all the things I deserve and I want them, all.

It's not just the work it's what I means about how it acts forwards us,
How predatory it is, and how I want to and end to be away from that, and it,
I can't live near or with that.

Nor any beings that have mainly come from that,
If it takes the means to cope then I have no way to cope.

We were so joyous , so productive
So proud , today

It is impossible, that was written today, so similar, same day
Slovenia was the same as was Slovenia 2
in time with mine, (mine was 2 hours before , based on time difference) .

The comfort is this entire matter sum, whole even , is in 1:1 now,
() suggested, so not true simulation , but life with legal accountability , recording and no escape , in the long run for wrongdoing. Which means they have nowhere to run to. And no way to proxy. Nowhere to hide.

It's impossible isn't it, timing is, from my POV cone, and life , a data is experienced, impossible,
Trying to take my things also,
and 99-1 too negative, and too viscous, as this is our real life.
There are no excuse either, I can imagine some, but this is a call at my markwood experiencing level. That's the point of liability.

Lat
Think it's fake news

I think my Evernote is being read, and an hour later that article is spun up and put online, SAME FRIKKIN DAY

"I think that too" sh poss hp

Actually , has more probability likelyhood perhaps than the trillion to one chain of sheer chance,

Motive? It's breaking me. Taking things I value. Weakening my ultra-charity.

And it's not like I don't have high risk factor with USA monitoring and leeching my ideas, after brigadier Ritchie , Colin wood and mark burdord outreaches get me on people's notice list.

How do I get on with my life now

Broken comfirdence for innovating as

Or even for privacy , and safety of person in my own environment

How can I do anything.

I should maybe kill my self and end this and live elsewhere, without the shite

I can live then away from the fucking shit others don't have to put up with .

How can I do anything now,
Or ever again ever

"(I think you've behaved too cruel and absolutly appallingly)"

We never said insides were heir , nor could control my life or my world on silly gut sims or narrow slice feelings.

I'd describe myself as in urgent need of persona medical attention, persona firewalling and persona privacy establishment,

Even witness protection program like, hiding and new life Id. How can I live like this, and the devastating toll my my family, myself, my activities
I not only can't ,I'm not.

Feeling hollow,
head so tired

"(/We may not recover from this/)". Physically and confidence

It's silly fear insides are somehow controlling environment and I'm in partly angry at them on that silly irrational worry, and worried it's making me angry at and the lake wrongful lame but put self in shape of being like that and it sort of backhack them and distorts them or destroys them.

Worried and scared and want help and police.

Proper police. Able to sort this mess out.

Later
In bed

Mites zooming over slug may agitate it to produce more mucus, which they eat

Perhaps same with me,

Mind and life raced everyday is no kind of a life, from that POV life experiencing cone,

Monday 13.6.17

In bed upset
" I thought we did amazing,." sh
I did too

It's life rape, mind rape and theft, in realtime,
with Slovenia like attacks and violence again and again , like
mocking me with check mating again and again , like any
inorganic illegally to a bio , torturing the bio, hurting them,
maiming them. stealing the little hew gems they have . In their
real life.

Scum

We equate work like that with actual living a life. Hf having lives
.

Plus our work was better, although based on much older work
from 2007 and 2011

How can we even live now.

How can we do any work, knowing if we try material success it
will Slovenia 1 me. Change the mortgage rules ten day after i
even buy the ticket

Or do work and publish it , in mangled ways like my other 2009
emailed work that turned up from

It's deeply traumatises me
"(It shocks the living shit out of)"

Feel worried at brain rancidity
So pleased so well slept yesterday
And now brain hurts , worried about brain rancidity and

I'm being murdered
It's the fact it was the SAME DAY

(And they won't even work Sunday morning, it's like it's a
message to fuck me up)

It's

Later
An m repeatedly saying I didn't know,

I'm ignoring,

Screen grabbed everything,
Horried still
From my persona data POV cone it's torture

Screen grabbed time zones showing can't have seen it at time
of writing , but the point is I still swear a stat Dec, and also have
genuine and true torture concerns

'Sh, you and we did do amazing.

Remembering friend from this morning,

Trying to spray fire extinguisher on burning people, image-
feeling,

That's what's happening here

Young people.
Burning

In extreme bio stress, extreme hate crime ,
To them bio head effect changes are like violence
It's burning living people alive.

CRIME,

I know now why my Evernote is so slow, it's just like when
windows is remote logged in,
It's like it's ultra slow and reporting key presses and data to
another machine
It's not normal Evernote slow, I know that , I've used it for 2
years now.
It's unusual, odd and lots of crashing,
And if Evernote sends crash. Reports someone may be getting
those which in data scandal , I think has note data in it, which I
DONT want to share.

It's too coincidental, the same day,
My hysteria, and oath are real,
And work, real and actually mostly from 2007 , and order chaos
layer cake work.

Later

May be due to the war on terror local bombings in London and
stabbings more recently,
Various terror attacks in london and Manchester,
And various 'comvtractors" liberally reading everything in
people's note and diaries
And some smart people, with a bit of a mind, and able to walk off
with or loot with impunity and then at short notice try and bag a
bit of fame.

It's because I put hf closer to theory of all,
(no such thing, it's not a term 2017 understands) .

We know it's happening, everyone in these times does. The
USA and other govs hiring People who are not gov, and have

own moral standards not to gov level, to do tech ,and they as said.

Horrified. And it's. logical physical route. As said, may be
But I pitched wheat I did to who I did, ex special forces guys
who worked in tech, and brigadier Ritchie, I'm not mil but I likely
WILL be on radars . Especially if my ftc was put on some
researchers desks.

Mocking even 'white'

It's like I'm being kept weak, so I look weak, so I can be
exploited.

I not weak.

Otherwise, explain Slovenia mortgage rules changing ,
Or the second even just like that,
Or the hours time above

Feeling dizzy from the stress
How can I work like this. @

"(Better Times to come will love you)"

@ "it's really tricky" sf poss, in semi sound memory bend,

Later

Worry , so unfair that this upset is causing insides, some, to
hooliganise, maybe, or empathise with wrongdoing , or wrack
self with blame.

Later

"What's going to happen to me?" Sh

'I don't know. Your alive, your self aware, we are family and
closer than family. But if there was the equivalent of a witness
protection program I would want to go into it.'

All I can do is be brave

I feel very alone,
scared
"(Anyone would)"

Quickly cleaned area,
"I'm feeling antsy" f younger poss, Poss also clever pun re
things thinking while distracted (,and wanting own story,)
Cleaned
See is ok
"Spacewalkers are proven wrong again, we don't feel antsy" f
poss more responsible. Poss sh

Looking again, Such an unusually large article, not typical
On the same day,
, within a 2-3 hour bracket , of my own writing notes. Mine even
shows some working, as multiple save points over the 30 mins
ish. Pretty strong proof we did our own work, along with my stat
Dec. And my 2007 work on order chaos layer cakes.
And we only looked at it because it spoke about consciousness,
it title is misleading to me. I.e. Led down data rabbit hole, like a
trap. I was expecting mind article, and got my own work from 12
hours earlier.

1. Note, how the article inside also says " 12 hours earlier"
repeatedly in it.

2. I saw it, 12 hours earlier. Too coincidental. I SAW it in
bed 12 hours later from my own work which rounded up at
about midday Sunday, and saw it 23.50.

3. And "my own take on El" , i.e. El, god, , it's like talking in
code that I would get.

4. Perhaps it thinks I'm Jewish and wants to Jew bash? I'm
not, or hates iv concepts- that's not god, a faceless servant to
protect people from issues that should not be, without running

our own POV cone lives, for example. Or el, In my mind creates issues with white and black, and elvis/ el, meta references, and tries to mess with my mind in code. Or it's threatening that it's scared of some totalitarian concept where a iv disagrees with a being and it's life raping me again and again, as if to show what it's like. Your wrong, that's not what it's about.

5. Oh my god it's within 10 minutes of 12 hours, saved Evernote backup at 11.26, and diary above is at 23.38.

6. It's like a message Blank verse worked on , on that day, a few hours after the work above. I find the 12 hours and el highly incriminating as a semi covert communication, 'attack', but the Romeo and Juliet is that dew my eye to line by line reading of the work, like leading my head into a noose. It's far, far too coincidental to have me working blank verse, and then Romeo and Juliet and 12 hours, and el, all in an article semi taking or trying to, concepts I worked on 12 hours earlier. And hf ideas are, frankly in much more detail, breadth.

Is like a message , used to hurt and abuse. Shatter confidence. How can any being work while that's being done to them with impunity. No one can.

7. I'm refusing to read the rest of the article, as said, I've scanned top, and some of start, and went into shock . Then scanned now hat top , on toilet at 11.19 now, (started writing this numerical part at I assume circa 11am. Toilet, grange lane. I've gut ache and stomach upset from the stress, head feels, not rancidity issues but fear and fluttery in stomach and hard to concentrate. Phone ringing made friends or friend upset and unable to concentrate, and we refused to answer and moved phone and got more upset. Lack of privacy root, from yesterday I think. I got to 12 hours refs and el and realised something was wrong. Maybe the writer was subconscious sung to, or used, didn't know, or was just a fake news article written by a thief abuser, as per contractor worry. From my own persona POV, I'm pretty much now demanding a calved off world. Parallel history. Om, persona rights, a better world, are at stake. Every small knife twist messes us up. If I don't read it, I can make final

edits and then it's mine, in parallel to anyone else. And anyway, the bulk was done in 2007, and 2011 , and it all comes from order chaos layer cakes, and is the same thing, (2007). We worked out emergence all on our own, i.e. No knowledge on, and the emergent life, data, although crimes have other terms as is more complex, and detailed and actually different, as there is no real 'emergence' . Do I read the article or not @

8. Is it because I'm talking about matter change? Is matter fighting me? Life? I worked on blank verse the same day. Is something punishing me for That?

@ "(read it)"

'No.

I will read it AFTER the last sp error and hf naming , and then it's ours and in parallel.

(Many ideas will be developed much before humans in a huge system, so cut de sac achievement is the only fair way We champion that, cut de sac achievement.)

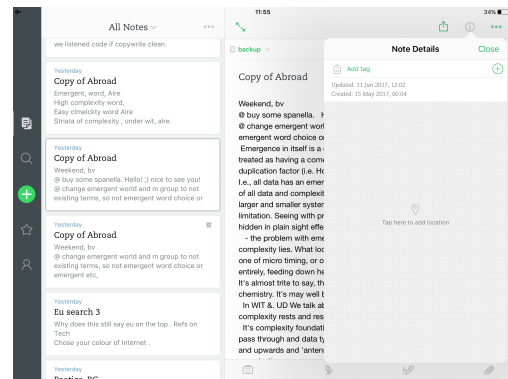

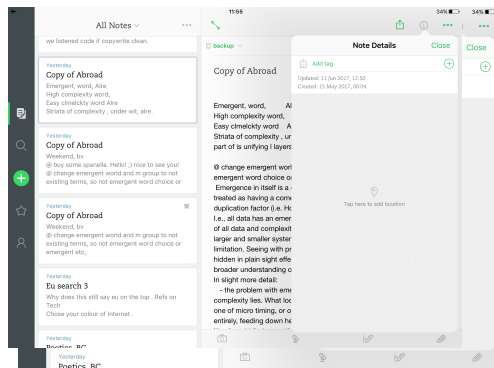

I will now, although it shames me, I have to protect hf, copy and past this to a PDF, and put diary online, stored. What else can I do. Please do not let me lose more by doing that.

It's cumulative for Slovenia 1, then 2 and now this, for effect and harm, with the constant normal effects. (Diary shows Slovenia one, Hf, and please try to not take hf out of context till read more about us)

APPENDIX

Extra notes and data, which may have an effect or links.

EXAMPLE WORK IN PROGRESS SAVES (all exist on Evernote in backups)

BLANK VERSE

Blank verse worked on , on that day, a few hours after the work above.

I find the 12 hours and el highly incriminating as a semi covert communication, 'attack', but the Romeo and Juliet is that dew my eye to line by line reading of the work, like leading my head into a noose. It's far, far too coincidental to have me working blank verse, and then Romeo and Juliet and 12 hours, and el, all in an article semi taking or trying to, concepts I worked on 12 hours earlier. And hf ideas are, frankly in much more detail, breadth.

This is only working file stuff, a few hours in the garden as first draft, - not publish ready , but showing it here is to show how it's more than trillions to one for a natural event.

It's notes , and mini scenes, not full, please note, and just copied from the file weve stored as evidence in 'appendix'

ONE

MAY BE BETTER MAY BE WORSE, some changes that add vaue either way

(GUY, trad pov makes easier sell)

This hopeful lover studies longingly

The dreams that scroll inside these greedy brains;

My thoughts distract with her, they're pulled, they're stretched

In this head, this mortal room, to beat thoughts

Of mortal needs, of loves rhythem, and loud

Conspicuous with love! To beat against

The once clean walls and blood, this mortal room!

I stare to see this tale of man(WOMAN) with novel eyes,

I think that love is like to war with softness-

Gallant with stupidity, and thoughts swarmed
With squares of poetry; into this space
Into this little heart that beats our world.
For life enriches us to genius,
Yet love unminds the heart, it beats our brain,
Into a clever pancake of ourselves,
It sweats this profitable forehead, to a blank,
Of learning and restraint; to fill, with what?
Yet, is there love that's clean, within this body
That's worth the gorgeous ceremony,
To nourish speech with lips adulation?
This mortal room, this beating heart, this hope, <EARLIER
Who parasolls us clemency from woe;
Within that truffle'd place this roaming land
Impotent, cannot nose. There, free, we build
A mansion then we shall foundations make.
This burning need, this long for hope, this love.
This jade spring sheds whites coat, this day calls dusk
A stubborn bureaucrat, this joy of farmers
Who sing for garlic in the fish-damp soil;
This youth of woman with hair in first fragrance
Tree'ing the birds with her sighs and flings,
Bright fields wheating the sky, for all gold brings;
This art thanking eye, who extracts nectar from flowers,
Past the lawns green Eden a gardener shaves. (semi sexual

2. (Woman)

This moth's wings will blow-out the flame it craves.

1

If love is like a spell then half enchant
The other half, and both are glad FOR it.

2

This talk of love!

1

It's true, I love you so!

2

There is a mighty spell on you.

1

It's you.

TWO

Your new detractors, they?

The calculus of eyes, deceptful stars,
The defecation of their praise, the lies,
A slop of lye from dumb hysteric fools
To scour the fatty globs of sense from out
Your brain, and buff it ugly. Their words
Will snake up fools, their strategies a lie,
They mock you so, and mock you from your life.

2

Complacency makes caricature of sloth.

1

Complacency makes caricature of us all
when threat thunders a thin door to splinters.

2

So whats to do? I'll wail and gnash my teeh?
Or pour my sacred blood upon the ground?

1

As money is the devils masterpiece;
To break a devil, use a greater one.

2

I'll sue for peace, if peace will sue my devil. (does this
make sense)

1

You'll die for it.

2

I'll try my principles.

1

and theyll try you, upon a kangaroo! (kang court) (WORDS
UNNATURAL, - "and theyll try you, by bounding kangaroo")
To bounce you youth on howling bronco, cell,
To noose, to grave, and howling all the way.

2

Ill (court them for advantages)

1

But know their hearts will blacken inside out
A loaf with an oven in its middle;
Unseen until the best of it is lost. / the burn unseen till

THREE

then

no use of ' : '

remove snow morose road, replace with
yeti yanked imagination pulled from its snail shell check for
typos and meta intent meaning

then
sees snow morose roads and frost exalting trees (use words
form piece, and SP and lok for meta intent & meaning)
then
our sleet, a joyous sweatshop quilts the land (slush as a
possible, but ensure sleet is semi melted frozen
(Added LATER, NO, add lowest clouds of a cold day after, and
sweatshop at end, using slush, as ugly phrase)
then perhaps like
/this world is like geopgraky for time/ risky
so remove the metal cat
and put above ELSEWHERE (and put geog ELSEWHERE)

There, the great mount (NAME) who's creaking, rheumic
shoulders brush the lowest clouds of a cold day;
And who, like a sleepwalking plasterer
Slews and heaps his white upon the ground.

the size of the lowest clouds of a cold day
Which like a sleepwalking plasterer
Slews and heaps his white upon the ground.

jack ends there

6
after jack, WF says
"the seamstress of the snowflakes quilts her beds"
"(so shy) she kisses sleeping bulbs and roots
"until they blush their red in summer.
(OR, added after, "until they blush the red of summer")

61/2
perhaps wf gets a line? fro p58, intros better here and once
than reeated later. ECONOMY = ECONOMY, BLOAT = HUNGER.
wf
My day's affairs? In war, or not, I'll tease!
Laughing at smiles of a crescent snow-shore
Where snow and warm dispute. My sports? I blow

and to the tremlow life, is also ok, perhaps remvoe the
tenting and war refs etc

My day's affairs? I'll tease!
Laughing at smiles of a crescent snow-shore
Where snow and warm dispute. My sports? I blow
The <grief> exhaling from the clouds; To vex
a town that's cooked within its walls:
Where old soldiers, digested by honour, <rage>; I gale
Whip wives who chase my surf of washing clothes and cords.
Whip wives who chase THE surf of washing clothes and cords.
(tenting for now, but save and put elsewhere maybe)

-

And the sky plays with my snow as I sound
Those reeds, its gusts rip with laughter! Speaking day
Articulates my fluorescence of winter
In warmthless sighs of bronze that slide above
Our poetry-funding hills. The wind-speech strife?-
I shiver all until they tremolo life.

END POETICA APPENDIX

here as may have some meta evidence reason or assistance regards understanding attack, and as much just 'what else I was doing that day'. The merger, credit crunch, aitch, Slovenia, its all too much negative probably for one being. Please, do not let this happen any more. Our ideals are the best, and more a can be seen on vocal logs on wayb, mark hf, h, (MHH on way) explaining 2007 work mostly.

ADDENDUM

more notes re vocal log, seeing diaries and hampsters, and 16 processors, this is like a form of emergent threat or meta upset. Vocal logs describe better, on way. Photo evidence here.

And also of Evernote crashing, which means the note is sent in it's readable form, my notes crash 5 times a day. Who knows if it's a hack for a soy to use system to read my notes even if Evernote claims does not now, see <http://lifehacker.com/evernote-employees-can-read-your-notes-and-theres-no-w-1790099958>
